

I am adamantly opposed to the proposal challenging Indiana's Telephone Privacy law. More specifically, I do not agree with the attempt to impose the federal "established business relationship" exemption on Indiana consumers. This is simply an end run around the law that will permit calls I do not want to receive! The Indiana law has resulted in a significant drop in the number of unwanted calls I receive at home, and I oppose any change that makes it easier for businesses to invade the privacy of my home!
